Gulf War

110 Initial Live Comp < 8 issues	Date of Claim: see 526ez
--	---------------------------------

Post-Discharge Claim

Payee Number: 00

Remand: NO

Fatigue

Classification: Gulf War Unexplained Chronic Multi-Symptom Illness

Type: NEW

Contention Priority Issues:

- Gulf War Undiagnosed Illness Claim - Initial

Standard Language Output Text:

The Veteran is claiming service connection for Fatigue. Please examine the Veteran for a chronic disability related to his or her claimed condition and indicate the current level of severity.

MEDICAL OPINION REQUESTED: General Medical Gulf War Opinion

Please examine and evaluate this Veteran with Southwest Asia service for any chronic disability pattern. Please review the claims file as part of your evaluation and state that it was reviewed. The Veteran has claimed a disability pattern related to Fatigue.

Please provide a medical statement explaining whether the Veteran's disability pattern is:

- (1) an undiagnosed illness
- (2) a diagnosable but medically unexplained chronic multi-symptom illness of unknown etiology
- (3) a diagnosable chronic multi-symptom illness with a partially explained etiology, or
- (4) a disease with a clear and specific etiology and diagnosis.

If, after examining the Veteran and reviewing the claims file, you determine that the Veteran's disability pattern is either (1) an undiagnosed illness; or (2) a diagnosable but medically unexplained chronic multisymptom illness of unknown etiology, then no medical opinion or rationale is required as these conditions are presumed to be caused by service in the Southwest Asia theater of operations.

If, after examining the Veteran and reviewing the claims file, you determine that the Veteran's disability pattern is either (3) a diagnosable chronic multi-symptom illness with a partially explained etiology, or (4) a disease

with a clear and specific etiology and diagnosis, then please provide a medical opinion, with supporting rational, as to whether it is “at least as likely as not” that the disability pattern or diagnosed disease is related to a specific exposure event experienced by the Veteran during service in Southwest Asia.

The Veteran needs to report for all examinations for the following Contention:

- Fatigue

ACE process must not be used to complete the DBQ(s).

For this Contention, VBMS expects a results package to at minimum include data pertaining to the following DBQ(s):

- DBQ Gulf War General Medical (including Burn Pits)

Headaches

Classification: Gulf War Unexplained Chronic Multi-Symptom Illness

Type: NEW

Standard Language Output Text:

The Veteran is claiming service connection for Headaches. Please examine the Veteran for a chronic disability related to his or her claimed condition and indicate the current level of severity.

MEDICAL OPINION REQUESTED: General Medical Gulf War Opinion

Please examine and evaluate this Veteran with Southwest Asia service for any chronic disability pattern. Please review the claims file as part of your evaluation and state that it was reviewed. The Veteran has claimed a disability pattern related to Headaches.

Please provide a medical statement explaining whether the Veteran’s disability pattern is:

- (1) an undiagnosed illness
- (2) a diagnosable but medically unexplained chronic multi-symptom illness of unknown etiology
- (3) a diagnosable chronic multi-symptom illness with a partially explained etiology, or
- (4) a disease with a clear and specific etiology and diagnosis.
